AMENDMENT

Commissioner of Patents and Trademarks
Washington, District of Columbia 20231

Sir:

Applicant respectfully requests that the above application be amended as follows:

SPECIFICATION

N.E. Page 19, line 20, change "electromagnetis" to "—electromagnetic—".

N.E. Page 22, line 26, change "optical-toRF" to "—optical-to-RF—".

CLAIMS

Please Add the following claims 21 to 33:

21. An apparatus enabled to transmit at least one carrier signal occupying at least one predetermined frequency band, the apparatus including:
a multicarrier-signal generator capable of receiving an information-modulated electromagnetic signal and generating an electromagnetic information-modulated multicarrier signal therefrom, the information-modulated multicarrier signal having a plurality of information-modulated frequency modes, and
a carrier-frequency selector coupled to the multicarrier-signal generator, the selector capable of isolating at least one of the information-modulated frequency modes.
22. An apparatus capable of providing frequency selection of a multicarrier transmission signal including:
a multicarrier-signal generator capable of receiving an electromagnetic seed signal and generating an information-modulated multicarrier signal, the multicarrier signal having a plurality of frequency modes, and
